The [Minnesota Paradox](#), as presented by Dr. Samuel Myers, Jr., points to the coexistence of high standards of living and progressive politics in Minnesota coexisting with stark racial disparities, especially for Black and Native American Minnesotans.

The [Minnesota Solution](#), offered by the **ALANA Community Brain Trust**, is a policy blueprint to address the racial economic gaps of the ALANA (African Latino Asian and Native American) communities in Minnesota. Details were presented to the [Minnesota House Select Committee on Racial Justice](#), chaired by [Representative Rena Moran](#) and [Representative Ruth Richardson](#) on October 20, 2020 (download copy below).

## The Economic Cost of Racism in Minnesota – \$287 Billion

Racial disparities cost an estimated loss of \$287 billion dollars for the ALANA communities in Minnesota. This includes \$22 billion loss in income because of the wage gap, \$174 billion loss in lifetime earnings because of the achievement and skills gap, \$24 billion loss in home-ownership, higher rent burdens and higher property taxes, and \$67 billion loss in business revenue because of the capital gap.

### **\$287 billion Cost of Racial Disparities in Minnesota**

#### **\$22 Billion loss in Income**

Closing the income gap would cause ALANA income to double to \$47 billion dollars. ALANA tax payments to \$5 billion

#### **\$174 billion less in life time earnings**

Not Closing the educational gap resulted ALANA lifetime earnings to decrease by \$174 billion dollars

#### **\$67 billion in business revenue**

Investing in ALANA businesses to grow to the same size as white businesses could increase sales by \$67 billion in Minnesota

#### **\$24 billion loss in home ownership, reduced rent burdens, lower property taxes**

Closing the housing gap would cause ALANA residential real estate to increase by \$23 billion dollars.

Renters would see a gain in \$1.53 billion if we eliminated the housing burden gap

Closing the Property Tax assessment gap for Black homeowners would come to \$23 million annually

ALANA households pay an extra \$64 million in wrong property tax assessments

Source: BLS for Wage Gap, 2017 ACS for housing gap, OHE for education gap, SBO 2012 for business gap

## The Minnesota Solution: Recommendations

*ALANA Community brain trust*

### There are 5 elements of the Minnesota Solution:

1. View the ALANA Communities as a \$1.4 Trillion Asset to Minnesota
2. People need to be at the core of our economic development efforts
3. People, Policies and Programs should operate with Cultural Intelligence
4. Empower individuals to effectively engage with their social, economic, institutional, and personal environments
5. Initiate a series of Sustained Investments in the ALANA Economic Development Infrastructure in Minnesota (see below)

*First, view ALANA communities as one of Minnesota's most valuable assets is the first step to address the negative stigma and actions of racism and the deep economic, social, health and wellness of the ALANA communities.*

**Second** – there has to be a focus on people as the core value behind all our efforts. Economic development activities have to be measured and assessed on how effective they are in building wealth of ALANA people in Minnesota and how well they include and utilize ALANA businesses and workers in all spending and programs of the state. This involves offering a comprehensive portfolio of programs and services that include various elements (Give a fish, Teach people how to fish, Build the capacity to fish, Provide a space to fish, Help invent a new fish and Transform the fishing industry)

Strategies and metrics to focus on impact on the most vulnerable to assess progress

32

www.empoweringstrategies.org

**Third**, people, policies, programs, and institutions in Minnesota should operate with cultural intelligence. They should understand and engage effectively with the diverse Minnesotans that live in Minnesota and make the policies, programs, and institutions accessible as well as utilized effectively by the ALANA communities.

#### Individuals Ages 25–64 By Educational Attainment (High School)

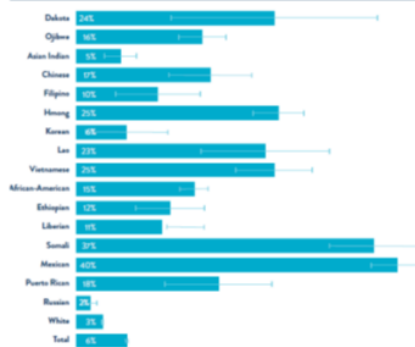

About 180,000 adults between ages 25 and 64 in Minnesota have not earned a high school diploma or equivalent. Consequently, these Minnesotans have narrow employment prospects and limited earnings potential—few of the occupations available to them pay a wage sufficient to support a family outside of poverty. Adults without a high school education are at a much greater risk of unemployment, poverty, and the need for public assistance. Forty-one percent of Minnesotans ages 25–64 who do not have a high school diploma are either unemployed or not participating in the labor force.

Figure 8b: Population Without a High School Diploma or GED, Ages 25–64

\*Indicates a value for which there were fewer than 100 survey respondents in the universe, resulting in suppression within the Data Supplement. See Technical Notes for more information about data suppression.

Figure 8c: Share Without a High School Diploma or GED, Ages 25–64

With Cultural Intelligence we can see differences within and between ALANA groups and can intervene more effectively.

Also focusing on certain groups such as female headed households in poverty or Black males or very young children, where research shows interventions can be very effective.

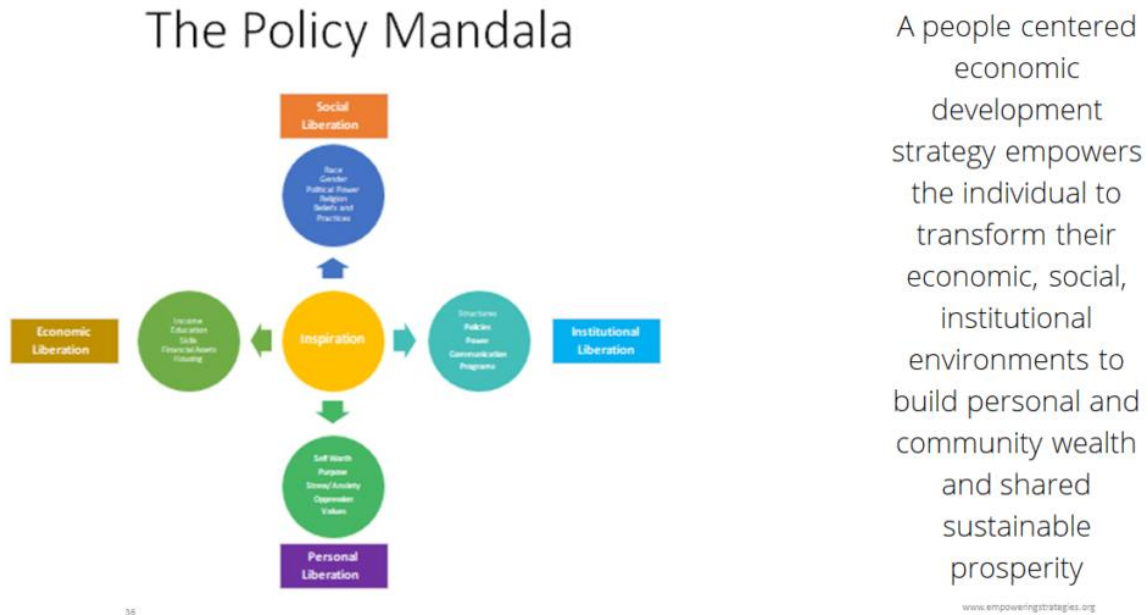

[https://mn.gov/admin/assets/MNSDC\\_EconStatus\\_2018Report\\_FNL\\_Access.pdf\\_tcm36-362054.pdf](https://mn.gov/admin/assets/MNSDC_EconStatus_2018Report_FNL_Access.pdf_tcm36-362054.pdf)

34

www.empoweringstrategies.org

**Fourth** – facilitate the process of empowerment where the individual can effectively engage with their social, economic, institutional, and personal environments and transform them effectively so that all in Minnesota achieve **shared sustainable prosperity**.

**Fifth**, to address the estimated **\$287 billion loss in economic assets** brought about by the racial economic choke-hold in Minnesota that includes, loss in income and wages, loss in lifetime earnings, loss in housing equity and high rental burdens and loss in business revenue, jobs and growth, initiate a series of sustained investments in the ALANA communities that can be done through the following actions- some which do not cause additional investments but require political will to implement and others that need sustained investments.

## Capital – \$67 billion Racial Entrepreneurship Loss. \$24 Billion Racial Housing loss

### *Solutions*

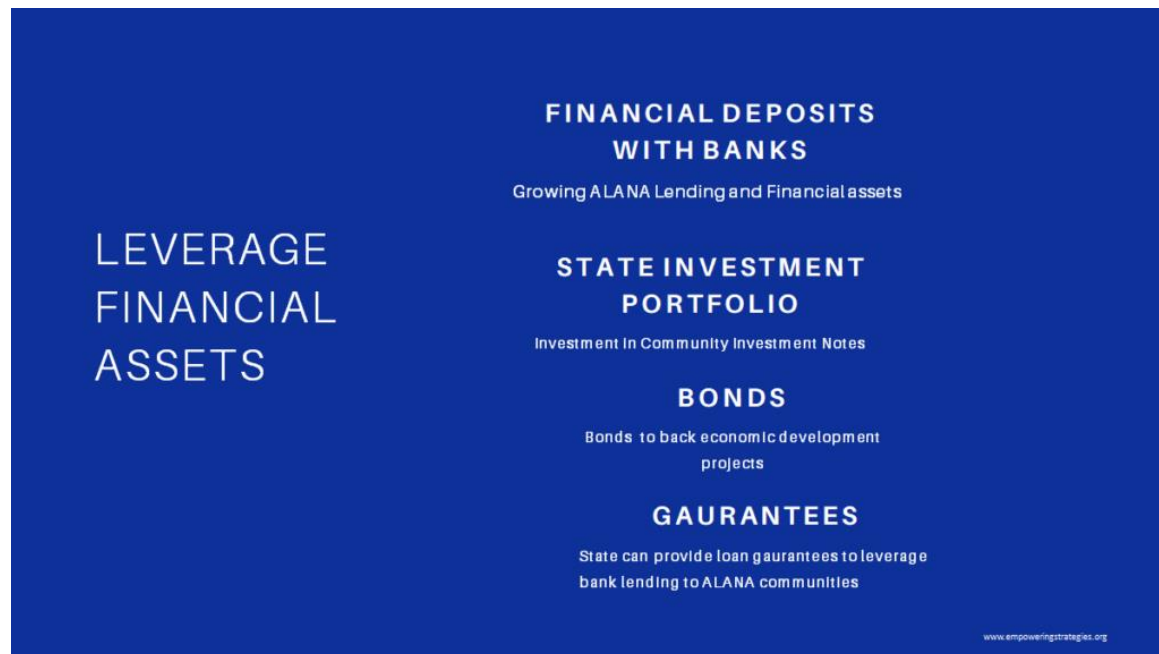

We need to bring accessible and appropriate capital to the community to help build loan and equity capital and grants for capacity building of both businesses and organizations serving ALANA businesses. ALANA businesses lost an estimated \$67 billion in revenue because of the racial entrepreneurship gap. ALANA communities lost an estimated \$24 billion in home ownership, rent burdens or higher property taxes because of the racial housing gap.

### Recommendation 1: Leverage Public Private Partnerships through leveraging state financial assets to provide capital for ALANA business and housing needs

- 25 million loan guarantee fund aimed at two segments of ALANA businesses needing capital to expand – those under \$250,000 in revenue and those over \$250,000 in revenue. The loan guarantee will enable Minnesota community banks and other financial institutions to increase lending to ALANA businesses.
- Establish an MOU with top financial institutions receiving deposits from the State of Minnesota to increase lending and the development of financial products (such as alternative finance products, prepaid cards, wealth building tools) especially for the unbanked.
- 5 percent of funds in the State investment portfolio to be invested in ALANA real estate development projects such as mixed-use developments and affordable housing projects.

- Allocate low income tax credit (LIHTC) and housing funds from federal and other sources to ALANA led affordable housing and home-ownership projects.

## Capacity – Underfunded Capacity in ALANA Led & Serving Organizations

ALANA led institutions are often stretched beyond capacity with the increased demands put on them to serve their communities. The state needs to invest in their capacity.

### *Solutions*

Recommendation 2: Increase the capacity of ALANA led and ALANA serving organizations

Include funding for ALANA organizations in the base budget of the departments so that there is a stable source of funding for these organizations.

Allocate a higher percentage of program funds towards administration/service delivery costs to help build capacity of organizations serving ALANA communities.

## Workforce – \$22 billion in racial income loss

The education and workforce gap causes the ALANA worker to lose \$22 billion in income annually.

### *solutions*

### Recommendation 3: Fund programs to increase skills and earnings of ALANA workers

- Increase funding for adult workers to gain English language fluency so that they can more effectively serve their customers and grow in their careers
- Fund career pathways and [opportunity skills/occupation](#) pathways to help low income ALANA workers increase their earnings and skills.
- Fund a comprehensive strategy aimed at [low income female headed](#) households (childcare, skill development, entrepreneurship) so that they can effectively improve the lives of two generations of Minnesotans.
- Invest in ALANA youth in the pre-K to K12 and the college pipeline so that they all graduate with at least a bachelor's or vocational degree in high wage-earning careers such as STEM and digital economy occupations. If this group effectively graduate with a bachelor's degree, they represent \$1.5 trillion in lifetime earnings and a very powerful engine of economic growth for Minnesota. Current workforce because of the education and workforce gaps have lost an estimated \$174 billion in lifetime earnings.
- Ensure the goal of 32 percent of ALANA workforce in all publicly funded construction projects is met for the State of Minnesota, University of Minnesota and Minnesota State projects.
- Increase funding for youth apprenticeships and work experience

## Arts and Cultural Assets: Underfunded ALANA Arts Organization and Cultural Heritage

### *Solutions*

There is a vibrant arts presence in the ALANA communities but historically underfunded and benefit very little from the \$2 billion creative economy in Minnesota, according to Creative Minnesota 2019. ALANA communities represent almost 12 percent of the creative workers in Minnesota. Wisconsin State Statutes 41.565 dedicates 10 percent of arts funding to minority arts organizations. Minnesota is a pioneer in leveraging cultural assets to grow wealth in low income ALANA communities reflected in Little Africa, Rondo, Little Mekong, District Del Sol, American Indian Cultural Corridor, and other areas.

### Recommendation 4: Increase Funding for Arts Based Organizations and ALANA Cultural Destinations and Districts

- Dedicate a minimum of 15 percent of the Arts and Cultural Heritage Funds towards ALANA Arts organizations and ALANA Cultural Destination areas and districts.
- At least 15 percent of all art in new public buildings be designated for ALANA artists
- Identify ALANA historic heritage and cultural sites and provide access to historic tax credit financing for ALANA heritage development projects.

## Procurement: Over two decades less than 2 percent ALANA business utilization

Despite the state having on its books State Statute 16c and federal Section 3 statutes that are

legally required to be implemented, the actual utilization of ALANA businesses has hovered around 2 percent of all state funding over the last 20 years. The ALANA entrepreneurship is an estimated \$67 billion loss in revenue. The state can effectively use its spending to grow and expand ALANA businesses.

### Solutions

Recommendation 5: Establish goals and report outcomes to increase ALANA business utilization in state spending.

- Establish and monitor the goal that at the minimum 10 percent of all construction and professional service contracts are dedicated for ALANA businesses (for the State of Minnesota, University of Minnesota, and Minnesota State).
- Establish and monitor the goal that at the minimum 10 percent of all state spending is dedicated to ALANA businesses (including University of Minnesota and Minnesota State).
- Fund ALANA organizations which help ALANA businesses build their capacity and monitor the growth of these businesses over time.
- Implement Section 3 low income business and workforce goals on all federally funded projects and report outcomes to the legislature annually. Expand Section 3 program to all state funded projects as a strategy to invest in low income communities especially those living in public housing.

## ALANA Economic Asset Building Infrastructure to address \$287 billion racial economic loss.

### *Solutions*

Redlining, barriers to access to capital and opportunity and other such barriers have cost the ALANA communities an estimated \$287 billion loss in income and lifetime earnings. To close these gaps we need a dedicated long term pool of investment capital that will fund an economic asset/wealth building infrastructure in every ALANA community that will include capital/equity/grant funds, business incubators and maker spaces, land trusts, affordable housing and home-ownership, cultural asset building, workforce development, and financial assets building tools.

#### IN AN ETHNIC NEIGHBORHOOD

INSURANCE

BUSINESS  
INCUBATOR

JOB BOARD

B2B

LAND TRUST

FINANCIAL ASSET  
BUILDING

EQUITY FUND

EMERGENCY  
SHELTER, FOOD,  
ENERGY

Recommendation 6: Establish a long-term ALANA economic asset building fund of at least \$1 billion with a dedicated source of funding:

- Capital (Loans, Equity, Grants, Working Capital, Alternative Finance)
- Housing, Home-ownership, Rental Assistance, Renter Equity programs
- Land Trusts
- Investment in ALANA CDFIs, CDCs and Community Based Organizations serving ALANA Businesses and Economic Development projects
- Workforce Skill Development, Career Pathways, Opportunity Occupations
- Business Incubators, Maker-spaces, Coops, Financial asset building tools

## Cultural Intelligence: Relating to the \$1.4 trillion ALANA economy solutions

ALANA communities face barriers in accessing government programs because of a lack of cultural intelligence by public employees. Employee training and a change in perspectives on viewing the ALANA community would help remove barriers to opportunity.

Recommendation 7: Cultural Intelligence training for public employees to effectively engage with ALANA communities

- To view ALANA communities as assets reflected in the \$1.4 trillion ALANA economy
- To offer an open and welcoming environment for all Minnesotans.
- To offer language access to programs, policies, and services.
- To understand cultural differences and assets in program development and implementation.

## Rules, Regulations, Protections – Barriers to ALANA Business and Housing

*solutions*

Rules and regulations can constrain the growth of ALANA businesses or to ensure an adequate supply of affordable housing.

Recommendation 8: Change rules and regulations that stifle ALANA business growth. Enact protections against predatory lending to ALANA and other small businesses

- Exempt small ALANA businesses from Labor agreements so that they can develop their capacity to grow. These businesses can provide living wage income to their employees through alternative strategies such as profit sharing.
- Restructure loan and grant programs from onerous paperwork and reporting requirements, reimbursement-based grants and ensure such programs are accessible to English language learners
- Change rules and regulations to allow for rapid growth in affordable housing in Minnesota, for example zoning laws or construction related rules that add to costs.
- Implement protections against predatory lending targeting ALANA and other small businesses as recommended by various district councils in Saint Paul
- Ensure that there is dedicated funding and focus on the unique needs of ALANA businesses and communities

## Stabilize Income, Jobs, Businesses during Current Triple Crises

### *solutions*

The current triple crises – Pandemic, Civil Unrest, Economic Decline has put tremendous downward pressures on ALANA income, jobs and businesses pushing back progress significantly.

Recommendation 9: Implement programs to stabilize income jobs and business decline

- Increase funding for income supports such as rental assistance programs

- Increase funding for neighborhood-based programs to connect people to jobs and skill development
- Increased funding for emergency grants to ALANA businesses
- Increase funding to ALANA neighborhood-based organizations that offer emergency assistance

## Leverage Federal Funding

*solutions*

**LEVERAGE CONGRESS THROUGH OUR CONGRESSIONAL DELEGATION TO MAKE THESE INSTITUTIONS MORE EFFECTIVE**

- FEDERAL RESERVE BANK**  
Federal Reserve Bank creates a lending program to back loans to ALANA economic development projects like in the PPP program. Funding for financial institutions led by ALANA communities
- SMALL BUSINESS ADMINISTRATION**  
Increase funding for the Microloan program and make it more flexible. Increased lending to ALANA businesses. Expand funding for technical assistance for community-based organizations
- HUD**  
Increased funding for affordable housing and renter assistance. Make programs more user friendly by streamlining regulations. Enforce Section 3 programs in all funded projects
- CDFI FUND**  
Expand the CDFI Fund capital to focus on ALANA led and serving financial institutions and expand funding to community-based organizations

www.empoweringstrategies.org

- Support efforts to empower the [Federal Reserve Bank](#) to provide capital to ALANA businesses through statutory changes in the lending facilities to support financial institution lending to ALANA led and ALANA serving community-based organizations.
- Support efforts to dedicate resources to the [Small Business Administration](#) and the [CDFI Fund](#) to provide capital dedicated to ALANA businesses especially ALANA micro-businesses as well as technical assistance funding for ALANA business serving community-based organizations
- Support efforts to dedicate resources from [HUD](#) to increase capital for ALANA housing, home-ownership, and rental assistance programs. Implement Section 3 Housing requirements on all federal and state construction projects.
- Support efforts to dedicate resources from the [Department of Education](#) and the [Department of Labor](#) for strategies to close the achievement gap and increase lifetime earnings for ALANA youth and workers

## Legislative Representation of ALANA Economic Interests

*125 legislative districts with ALANA economic assets at least \$100 million*

The ALANA Communities provided [testimony](#) to the Court Redistricting panel that developed the current legislative boundaries in Minnesota. Testimony received and acknowledged by the Court Panel focused on ALANA economic interests across Minnesota and the need to represent those interests. In the current Minnesota Legislature there are [125 legislators](#) who each represent at least \$100 million in ALANA economic interests. These legislators are from all political parties reflected in the legislature and possess the necessary votes to pass any legislation needed to grow the assets of the ALANA communities of Minnesota, especially in the context of the racial economic choke-hold on the ALANA communities in Minnesota. In addition the Minnesota Governor has a similar obligation to represent the \$1.4 trillion ALANA economy.
